Utility companies along with State & Federal Agents want to cover our high desert mountains and neighborhoods with massive wind towers and solar fields to feed the energy hungry Los Angeles basin. SCE will pass on the $900 Million bill to us for huge, new transmission lines to send power to Los Angeles.

SCE intends to place towers up to 44 feet wide that would be 500 feet tall. These towers would be scattered all over the landscape.

### What You Can Do

- **Join the Battle**
- **Sign our Petition**
- **Write to your State and Federal Representatives**
- **Attend Public Meetings**
- **Write to SCE and the CPUC**
- **Support our Litigation Efforts**

**THE L.A. INVASION of the High Desert**
